

FortiFone™ IP Telephones

Advanced features and easy operation

FortiFone telephones combine excellent audio quality with optimum usability, providing you with maximum value. The line-up covers the needs of the whole office, from basic user to advanced attendant.

FortiFone IP phones are loaded with advanced features and configure themselves automatically, so you don't need to be an expert to install them. And, because they plug into your existing computer network, you don't need to run phone wiring to each desk.

Programmable appearance/feature keys

Whether you want instant access to FortiFone features or need to see which of your lines or extensions are in use and which are free, the FON-360i, FON-460i and FON-560i fit the bill. Each has big, bright multi-colored LED light keys with customizable functions. So you can have a phone tailored to the exact way you like to work. Plus, once you have configured the phone's keys, you can print the dialpad with one click in the FortiVoice management software.

External IP extensions

Plug your FortiFone IP phone in anywhere and it can function just like your extension in the office. It's the perfect solution for teleworkers or employees who split their time between the office and their home office.
