

Rackmount your WatchGuard!

WatchGuard provides very good performing devices for small and medium sized businesses; however these are desktop models. These days businesses move to 19 inch racks and the new WGRack kits are excellent to fit WatchGuard devices into 19 inch cabinets.

The WGRack kit is an excellent add-on to place your high performance WatchGuard in a 19 inch rack. On top of that it brings the essential console and network connections to the front!

The WatchGuard model RM-WG-T1 has all the 6 network connections on the front.

Assembly will take about 5 minutes. Simply slide your WatchGuard device in the kit, place the retainers and connect the supplied cables to the keystones.

An extra feature is that the WGRack prevent accidental disconnection of the power supply.

WGRack kits are delivered in RAL 3001. Other colors can be delivered on project basis.

Model	Supported WatchGuard model	Dimensions
RM-WG-T1	WatchGuard XTM 2 series and XTM 33	1U
